SUMMARY

- Aspiring Full Stack .NET Developer and Computer Science student with hands-on experience in C#, ASP.NET Core, EF Core, MVC, ADO.NET, SQL Server, and building RESTful APIs.
- Shipped multiple production-ready systems including a Gym Management platform with Stripe payments and Gemini AI, and a Labor Marketplace with SignalR real-time chat and geographic search.
- Eager to contribute to real projects, grow in a team environment, and apply clean architecture and system design skills to solve business problems.

TECHNICAL SKILLS

Programming: C# • SQL • TypeScript • JavaScript

Backend: ASP.NET Core • ASP.NET MVC • Entity Framework Core • ADO.NET • Web API • RESTful APIs • SignalR • LINQ

Frontend: Angular • TypeScript • HTML • CSS • Angular Material • RxJS • NgRx • Bootstrap

Databases: SQL Server • Entity Framework Core • Stored Procedures • Query Optimization • Database Design

Tools: Git • GitHub • Stripe • Hangfire • Gemini AI • Chart.js

Concepts: OOP • Design Patterns • Clean Architecture • Layered Architecture (DAL/BL/DTO) • CQRS • SOLID Principles • Data Structures & Algorithms

Soft Skills: Problem Solving • System Design Thinking • Team Collaboration • Time Management • Adaptability

PROJECTS

MenoPro - Gym Management System [GitHub](#) [Linkedin](#)

Production — 2025

Personal Project

- Full-stack web application built using ASP.NET Core MVC with a Glassmorphism UI design.
- Implemented multi-role authentication for Admins, Members, and Trainers with JWT & ASP.NET Identity.
- Developed member portal with workout plans, diet tracking, and personal progress monitoring.
- Built admin dashboard for managing members, trainers, and subscriptions with Chart.js analytics.
- Integrated Stripe payment gateway for subscriptions and Gemini AI for fitness recommendations.
- Tech Stack: ASP.NET Core MVC • SQL Server • Entity Framework Core • Stripe • Gemini AI • Chart.js

Labor Marketplace System [GitHub](#) [Linkedin](#)

Production — 2026

Personal Project

- Full-stack platform connecting workers with job posters across multiple service categories.
- Implemented multi-role authentication and profile management for workers and employers.
- Built real-time chat system using SignalR for instant communication between parties.
- Integrated Stripe Connect for payment processing and Hangfire for background job scheduling.
- Developed geographic worker search using SQL Server spatial queries with NetTopologySuite.
- Tech Stack: ASP.NET Core MVC • .NET 9 • SignalR • Stripe Connect • Hangfire • NetTopologySuite

Outfit Planner [GitHub](#)

In Progress — 2026

Personal Project

- Intelligent wardrobe management system that generates outfit suggestions based on real-time weather.
- Analyzes clothing items against occasions and personal style preferences using weather API data.

- Built with Clean Architecture and CQRS pattern on the backend.
- Tech Stack: ASP.NET Core 9 • Angular 17+ • NgRx • SQL Server • Clean Architecture • CQRS

EXPERIENCE

Backend .NET Development

2024 – Present

Self Learning & Projects

- Built multiple production systems with layered architecture (DAL, Business Layer, DTO) using C# and .NET.
- Developed and consumed RESTful APIs supporting full CRUD operations and complex business logic.
- Designed and optimized SQL Server databases with stored procedures, indexes, and multi-join queries.
- Integrated JWT authentication, ASP.NET Identity, role-based authorization, and third-party payment APIs.
- Applied SOLID principles, design patterns, and Clean Architecture across all personal projects.

Full Stack Development — Angular + .NET

2025– Present

Project Integration

- Built Angular 17+ dashboards integrated with ASP.NET Core backends via RESTful APIs.
- Used NgRx for state management and RxJS for reactive programming patterns.
- Implemented CQRS pattern with Clean Architecture on the Outfit Planner full-stack application.
- Worked with Angular Material components, reactive forms, and route guards.

EDUCATION

Faculty of Computers and Information (FCI)

Cairo, Egypt

Bachelor of Computer Science

Sept 2023 – Present

- Specialization: Software Engineering • Full Stack Development

LANGUAGES

- Arabic: Native (First Language)
- English: Very Good
